

Agile Development Services for Automotive Company

PROJECT DETAILS

 IT Consulting & SI

 Jan 2017 - Dec 2018

 \$10,000,000+

“
"The commitment of the team and openness to change when necessary to achieve success were great."

PROJECT SUMMARY

Objective Group Inc - OGI provided agile development services for an automotive company. They also built an app for them. The development process consisted of assessment, training, and implementation phases.

PROJECT FEEDBACK

The company was happy with Objective Group Inc - OGI's work, which allowed them to achieve more than their goals. The team was easy to talk to and highly committed to completing the project. They were open to change and flexible. Their customer-driven approach and focused delivery were impressive.

The Client

Please describe your company and your position there.

I'm responsible for IT governance at an automotive company.

The Challenge

For what projects/services did your company hire Objective Group Inc - OGI?

for two main reasons 1- Agile transformation - we were with bad throughput in ours IT Teams and we had to improve it and implement agile methods as a group strategy. 2- an APP development

CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

How did you select this vendor and what were the deciding factors?

we were to the market to find the best consultants to help us in the goals. The main factor to decide for Objective was when we saw that they were not just an agile consulting company but also software developers and use the experience of agile consultants in their own needs, and vice versa. So they can see the results inside the company and if this bring value, sell the service.

Describe the project in detail and walk through the stages of the project.

we devided the Agile project in three phases:

in the assessment phase we had many interviews between the Objective consultant and IT and Business and received in the end a report with the analisys and the potenciales to improve. in the training phase we contrated sessions of training with the focus in Agile culture, in the implementation phase we had a senior consultant inside the teams to improve the changes and we did it with all ours IT Teams.

How many resources from the vendor's team worked with you, and what were their positions?

in the Agile iniciative we had 1 senior consultant in the app development a direct contact to 1 project manager, 1 senior Tech lead, 1 senior software architect.

The Outcome

Can you share any outcomes from the project that demonstrate progress or success?

what I can share is that we achieved more than our goals

How effective was the workflow between your team and theirs?

Easy to talk and communicate. The commitment of the team and openness to change when necessary to achieve success were great.

What did you find most impressive or unique about this company?

the customer driven and focus to delivery

Are there any areas for improvement or something they could have done differently?

None.
