“
“They fit well into our development style and deliver good results.”

PROJECT SUMMARY

Objective Group Inc - OGI provides custom software development services for a transportation tech company. They work with the internal team to build features and functionality using C# and other technologies.

PROJECT FEEDBACK

The client is satisfied with Objective Group Inc - OGI's performance. The development team meets the same quality and quarter goals as the internal team, and they stand out for their skills and knowledge. They also meet deadlines and communicate effectively via Teams, emails, and a ticketing system.

The Client

Introduce your business and what you do there.

I'm the senior VP of engineering for an intelligent transport system (ITS) technology company.

The Challenge

What challenge were you trying to address with Objective Group Inc - OGI?

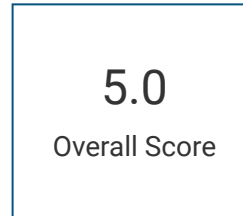

We needed additional help with custom software development.

 Senior VP of Engineering, ITS Technology Company

 IT Services

 Woodbury, New York

CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

What was the scope of their involvement?

Objective Group Inc - OGI has augmented our software development capacities. They provide a team of developers to help us build and implement new features and functions in our software products. They specialize in web and C# development but also use JavaScript, Angular, and SQL server.

What is the team composition?

We have a team of developers.

How did you come to work with Objective Group Inc - OGI?

We started doing business in South America, specifically Brazil. We needed to modify our products for their market, so we looked for a company headquartered in Brazil to help us. We found them on Clutch.

What is the status of this engagement?

We started working together in January 2020, and our relationship is ongoing.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

We measure their success with the same metrics we use for our other development teams. They build out the software on a quarterly basis, so we set goals for the quarter. The team has to reach that goal and deliver quality products. We see how many bugs escape into the field.

How did Objective Group Inc - OGI perform from a project management standpoint?

They meet the deadlines. Sometimes we ask them to accelerate some development items, and they always meet the request. Communication varies based on the individual. All the developers are in Brazil, but they all communicate in English. Some of them speak very well; others don't. However, they provide a team lead as the central point of communication, and they've done an excellent job.

We have a daily stand-up with the development team through a video chat. The rest of the communication is through Teams, emails, or our ticketing system.

What did you find most impressive about them?

They have an excellent team of developers. They're all skilled and knowledgeable; they fit well into our development style and deliver good results.

Are there any areas they could improve?

No, there's nothing I'd have them improve.

Do you have any advice for potential customers?

Run the same style you use with your internal team. Don't treat them like an external development company.
